Education

UIETH, Panjab University SSGRC

Aug 2023 – 2027

Bachelor of Engineering in Computer Science and Engineering

CGPA: 8.04/10

Achievements

- Solved 500+ DSA problems across LeetCode, GeeksforGeeks, and CodeChef online judges.
- Achieved a 1600+ rating on LeetCode.

Technical Skills

Programming Languages: C, C++, HTML, CSS, JavaScript, SQL

Core Computer Science Subjects: Object-Oriented Programming, Database Management Systems, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks

Web Technologies: Node.js, Express.js, React.js, MongoDB, MySQL, Tailwind CSS

Development Tools & Environments: Git, GitHub, Postman, VS Code

Experience

Veontra – Full-Stack Developer Intern

Feb 2026

- Built and optimized 10+ RESTful APIs using Node.js and Express.js powering an analytics dashboard SaaS serving 100+ users.
- Integrated MongoDB with Mongoose for efficient schema design and data handling across multiple dashboard modules.
- Connected frontend to backend APIs using Axios handling real-time data rendering across the analytics interface.

Projects

CivicVoice – AI-Powered Civic Complaint Aggregator

[Live Demo](#) | [Code](#)

MongoDB, Express.js, React.js, Gemini 2.0 Flash, Leaflet, Node.js

- Built a dual-mode **Gemini 2.0 Flash pipeline** using **Vision API** for photo complaints and **Text Analysis** for description-only complaints, keyword fallback ensures uninterrupted functionality during API outages.
- Engineered a **GenAI** petition drafter generating officer-addressed, ward-to-state-specific government letters with complaint-type-specific action demands in the citizen's own words.
- Implemented a 3-method location picker (**React + Leaflet + Nominatim**) using map pin, GPS, and cascading address search, resolving precise coordinates powering the AI and portal matching pipeline.

HireStack – Real-Time Coding Interview Platform

[Live Demo](#) | [Code](#)

MongoDB, Express.js, React.js, Node.js, Clerk, Stream SDK, Socket.IO

- Built **real-time** coding interview sessions with video calling, chat, and live code synchronization using **Stream SDK** and **Socket.IO**.
- Developed scalable **RESTful APIs** for session creation, participant management, authentication, code execution, and interview workflows.
- Engineered an AI-powered Mock Interview feature using Gemini AI and Web Speech API, enabling personalized interview question generation, real-time voice interactions, speech-to-text transcription, and automated performance evaluation.

Positions of Responsibility

Technical Society – C/C++ Mentor

2024 – Present

- Mentored over 50 students in C and C++ programming through structured problem-solving sessions.
- Led 10+ tech events and programs to help students enhance their programming skills.

Training & Placement Cell - Operations Head

Oct 2024 – Present

- Assisted in organizing and conducting 20+ placement drives at the college.
- Reached out to companies to facilitate placement opportunities for students.
